#### Perkins Diesel Power

# P R O G E N **2 0 0**

#### SERVICE PRP EPS **POWER DEFINITION** PRP: Prime Power is suitable for unlimited annual operating hours in applications with varying loads, complying with ISO 8528-1 POWER kVA 200 220 standards. ESP: The standby power rating is designed to provide emergency power in applications with fluctuating loads, adhering to ISO 8528-1 kW POWER 160 176 guidelines. Overloading is strictly prohibited. **TERMS OF USE** RATED SPEED 1500 As per the standard, the designated nominal power of the genset is r.p.m specified for specific conditions, including a 25 °C air inlet temperature, a barometric pressure of 100 kPA (100 m A.S.L), and 30% relative humidity. For installations with different conditions, STANDARD VOLTAGE v 230/400 please consult the derating table provided for accurate . adjustments. 380V/220V I 415/240V In the case of indoor use of generating sets, the ambient noise level AVAILABLE VOLTAGES v 440/220V cannot be specified in the operation and maintenance instructions due to its dependence on installation conditions. However, our exploitation and maintenance instructions do contain a cautionary **RATED AT POWER**

This document is non-binding - The Adpower company reserves the right to make changes to any of the specifications mentioned in this document without prior notice, as part of its continuous efforts to enhance the quality of its products. \*ISO 8528.

Adpower gensets adhere to ISO 9001 and CE standards, which encompass the directives listed below:

- Machinery safety (2006/42/EC).
- · Low voltage (2006/95/EC).

• EN 60204-1: 2006+A1: 2009, EN ISO 12100: 2010, EN ISO 13849-1: 2008, EN 12601: 2010.

Standard reference conditions:

The ambient conditions considered as reference, as per the ISO 8528-1:2018 standard, are 1000 mbar, 25°C, and 30% relative humidity.

Weights and dimensions are based on standard products, and the illustrations may feature optional equipment. The technical data provided in this catalog are accurate at the time of printing and reflect the available information.

### Standard Reference Conditions

In accordance with the ISO 8528-1:2018 standard, the reference ambient conditions are specified as 1000 mbar pressure, 25°C temperature, and 30% relative humidity.

The weights and dimensions provided are based on standard products, and any illustrations shown may include optional equipment. It is important to note that the technical data described in this catalogue reflects the information available at the time of printing.
